

Beginner 5K (8 weeks)

HELPFUL GUIDE ON HOW TO COMPLETE YOUR FIRST 5K

Ever want to run a 5k? Here is your chance. No matter where you are with your fitness, you can build up your endurance. Make sure you are in good health before attempting this training program. The training program below has been created to help you achieve your goal

- Running Shoes**
A decent pair of running shoes is highly recommended.
- Tracking App or watch**
Technology has made training simple. Your watch or phone can tell you when it is time to run or walk.
- Water Bottle**
Hydration is VERY IMPORTANT since we live in Florida. Running with a sport bottle help keep you hydrated.
- Stretch**
Stretching before and after running helps loosen up the muscles and helps prevent soreness as you increase your distance.

Helpful Hints

Juggling: Don't be afraid to juggle the workouts from day to day and week to week. If you have an important business meeting on Thursday, do that workout on Wednesday instead. If your family is going to be on vacation one week when you will have more or less time to train, adjust the schedule accordingly. If this means running hard on successive days, so be it. Program in an extra day of rest to compensate. Be consistent with your training, and the overall details won't matter.

Rest: Rest days are as vital as training days. They give your muscles time to recover so you can run again. Actually, your muscles will build in strength as you rest.

Run: Don't worry about how fast you run; just cover the distance—or approximately the distance suggested. Ideally, you should be able to run at a pace that allows you to converse comfortably while you do so.

Run/Walk: There's nothing in the rules that suggests you have to run continuously, either in training or in the 5K race itself. Run until fatigued; walk until recovered.

Walk: Don't worry about how fast you walk, or how much distance you cover
